A recent set of research indicates that young people use their cellphones differently than older adults use their cellphones. We have this belief that young people are constantly using their cellphones- texting, checking email, searching the web, taking pictures, and tweeting. Supposedly older people use their cellphones less frequently. But there is actually very little data on differences in how age impacts cellphone uses and beliefs about etiquette.

1- What is the difference between the usage of cell phones by young people and adults?

2- How older people use their phones?

3- Why the writer is unable to tell the reason for difference?

4- Summarize the above text
