ABSTRACT

Through the use of a mixed-methods approach, which includes questionnaires, focused group discussions, and observation checklists to collect data from teachers, this action research explores effective strategies for reducing classroom disruptions in a secondary school grade six setting. The goal of the project is to find and evaluate strategies that promote a more concentrated and effective learning environment. Through these methods, the study examines the impact of strategies such as setting clear behavioral expectations, promoting positive reinforcement, and incorporating engaging teaching practices. The data analysis reveals that clear communication of expectations, active student engagement, and consistent behavior management techniques significantly reduce disruptions in the classroom. The findings provide valuable insights for educators aiming to improve classroom management and enhance student learning outcomes in secondary education.

Govt. College of Education F.B. Area, Karachi

CERTIFICATE OF APPROVAL

HAFIZ MUHAMMAD MUJTABA SALEEM S/O, D/O, **MAQSOOD AHMED** student of B.Ed. (Hons.) Elementary has completed the Action Research entitled **“EFFECTIVE STRATEGIES OF THE CLASSROOM MANAGEMENT TO REDUCE DISTRUPTIONS IN CLASSROOM AT GRADE VI”** as the scholarly stander set in research project course guide/University of Karachi.

Signature of the Candidate: _____

Name of Candidate: **HAFIZ MUHAMMAD MUJTABA SALEEM**

Signature of the Supervisor: _____

Name of the supervisor: **PROF. TABASSUM KAUSAR**

Govt. College of Education F.B. Area, Karachi

DECLARATION

I, **HAFIZ MUHAMMAD MUJTABA SALEEM** S/O, D/O, **MAQSOOD AHMED**

student of B.Ed. (Hons) Elementary hereby declare that no part of the thesis titled

“EFFECTIVE STRATEGIES OF THE CLASSROOM MANAGEMENT TO

REDUCE DISTRUPTIONS IN CLASSROOM AT GRADE VI” presented by me has

been plagiarized from anywhere. Proper references are cited wherever necessary.

I understand that the University of Karachi reserves the right to cancel the degree if any of the above declarations are proved false before or even after award of degree.

Name of Candidate: **HAFIZ MUHAMMAD MUJTABA SALEEM**

Seat Number: **A1-20136027**

DEDICATION

My academic path has been built upon the constant love, sacrifices, and guidance of my parents, to whom this research is dedicated. Their unwavering encouragement and support have given me the willpower to go after my objectives and conquer every obstacle.

I am particularly appreciative of my father, Maqsood Ahmed, whose commitment and faith in me have served as a constant source of motivation. He gave me the strength to pursue my passions, the value of education, and the significance of tenacity. His support and affection have greatly influenced who I am now.

I hope this piece reflects the lessons they have taught me and acts as a small mark of my appreciation. We appreciate your sacrifices and steadfast support. This achievement is a result of your support and affection.

ACKNOWLEDGEMENT

I want to express my gratitude to everyone who helped make this research a success. For their enthusiastic participation and support, I would like to express my sincere gratitude to the teachers and students at **Government Girls Comprehensive Secondary School, Block M, North Nazimabad.**

My supervisor, **Prof. Tabassum Kausar**, has my sincere gratitude for her excellent advice, support, and criticism, all of which helped to define the course of this project. I also want to thank my critical friends for their helpful criticism and steadfast support along this journey.

Lastly, I want to express my sincere gratitude to my mother, whose support and affection have always given me courage. We appreciate all of your tremendous help and efforts.

CHAPTER 1

INTRODUCTION

1.1 BACKGROUND OF THE STUDY:

One of education's main goals is to mold excellent behavior. The internet has recently exposed us to reports and clips about disruptive behavior among learners. (IIUM Journal of Educational Studies, Vol 4, Issue 1, 2016)

Effective classroom management has an immediate effect on students' overall achievement and the learning environment. It is an essential component of good teaching.

Classroom management is the term used to describe all of the words and actions that teachers use in the classroom to plan, enhance, and raise student accomplishment. (Marzano and Marzano, 2003; Weinstein, 2004).One of the main objectives of education is helping students develop socially, and teachers' actions and behavior in the classroom help learners achieve this goal (Ten Dam and Volmen, 2007).For successful teaching and learning, competent classroom management is necessary. Hence, in order to assist students in achieving the various learning objectives for which they enroll in formal education, teachers must implement the proper tactics.

Students who participate in disruptive activities on a regular basis likely to perform worse on assessments and get lower grades in classrooms with such behaviors (Shinn, Ramsey, Walker, Stieber, & O'Neill, 1987). Moreover, attempts to manage

disruptive behaviors take a significant amount of teacher time away from academic education. Teachers are bound to encounter disruptive behavior in the classroom, as Seidman (2005) claims. Students display a variety of disruptive behaviors that must be effectively and efficiently managed in order for teaching and learning to occur. Kuranchie (2015) notes that students frequently engage in disruptive behaviors like talking, eating, and drinking, making noise, verbally abusing, intimidating, and using insulting and offensive language, among other things, that tend to impede the efficient flow of teaching and learning. The initiation and persistence of violent conduct are significantly influenced by the school environment. For kids who are at risk of developing emotional and behavioral disorders (EBD), early intervention and therapy are crucial in preventing the start of more severe behaviors (Kauffman, 2005; Greer-Chase, Rhodes, & Kellam, 2002).

In along with frequently reporting high levels of stress and burnout symptoms, teachers who suffer significantly with managing student behavior and classroom discipline are also typically inefficient (Berliner, 1986; Browers & Tomic, 2000; Espin & Yell, 1994). Positive educational outcomes for students and teacher retention depend heavily on instructors' capacity to maintain order in their classrooms and control student conduct. Ceson(2021) emphasized the need of classroom management by stating that even on the best days, managing kids may be difficult. Because of this, the teacher's expectations for classroom management practices need to strike a balance between fairness and toughness.

Cescon (2021)

1.2 CONTEXT OF THE STUDY:

School systems have been concerned about disruptive behavior in classrooms for a number of years. In fact, behavior and classroom management are the single most frequent requests for help from teachers (Rose & Gallup, 2005).

Effective classroom management has a significant impact on student behavior and academic results, making it an essential part of education. Disruptions in the classroom can reduce the effectiveness of teaching strategies, hinder learning, and create a negative atmosphere. Teachers frequently encounter a range of difficulties in diverse classroom settings, such as differing classroom dynamics, behavioral problems, and student needs. Disruptive behavior is any action that hinders a student's learning, other students' learning, or the teacher's capability. Throughout the classroom, disruptive behaviors are those that interfere with regular teaching and learning activities (Merrett & Wheldall, 1986).

In schools, one of the issues that arises in the classroom with regard to the teaching process is that students perform harassing behaviors that can disrupt both teachers and other students.

As a result, the process of teaching and learning is ineffective. Some disruptive student behaviors include back row diversion, which is when students sit in the back and divert attention from other people. Absence: A portion of the student body has not engaged in the designated class activities. Overly productive students: these are the intelligent ones, but they stand out and take over all class activities. Renandya and Richards (2002).

When reflecting back on my previous school experiences, I recalled how numerous of my classmates frequently caused disruptions in the classroom, which made it hard for other students to concentrate. Joking, making noise, and occasionally bullying others seemed to be more important to many than the lessons. I can remember times when educators were unable to keep things under control, creating a chaotic classroom that made it difficult for those of us who were trying to concentrate. But our teachers lacked a systematic approach to recognize and deal with this problem.

My curiosity about successful classroom management techniques was sparked by these interactions. I thought about what strategies might lessen these interruptions and promote a more respectful and energetic environment. I came to see that disruptive behavior not only made learning more difficult, but it also showed a lack of engagement between the teacher and the students.

Following the process of “reconnaissance” (McNiff et al., 2003) I carried out this action research to seek effective techniques for handling sixth-grade students' disruptions in the classroom. My goal was to improve classroom behavior through implementing approaches like structured routines and positive reinforcement into application. I intend to address these problems and create a more stimulating and courteous learning environment in the classroom by investigating and putting new strategies to enhance classroom behavior.

My goal is to develop actionable insights that assist teachers in fostering a more attentive and respectable learning environment for every student.

1.3 PURPOSE OF THE STUDY:

The goal of this research is to find efficient classroom management techniques that will help sixth-grade students experience fewer disruptions in the classroom. The study will concentrate on putting specific strategies into practice, like cooperative group work, structured routines, explicit behavioral expectations, and positive reinforcement. Additionally, strategies like mindfulness exercises and interactive class discussions will be used to encourage student participation and self-control. In order to create an environment that is favorable to learning, this study aims to evaluate how these tactics affect student conduct and involvement. Additionally, the study seeks to offer practical advice that teachers can implement to improve classroom management techniques and foster a more fruitful learning environment for all students.

1.4 STATEMENT OF THE PROBLEM:

Researchers at West Ed found that teachers who lacked classroom management skills were more likely to experience the negative effects of problem behaviors (Aronson et al., 1999). Establishing a supportive environment is crucial for students' academic and social growth. For the benefit of students, their families, and society as a whole, classrooms should encourage positive behavior while enabling teachers to spot and deal with antisocial behavior. Although maintaining a productive environment can be difficult because of the impulsive nature of the classroom and

the simultaneous activities, effective classroom management helps minimize disruptions and keep students engaged (Procknow & Macfarlane, 2008).

Teachers are essential in creating a constructive and upbeat atmosphere that promotes social and academic growth. Effectively handling disruptive behaviors, however, necessitates tactics that consider both the dynamic nature of the classroom and the variety of student needs. The goal of this action research is to find and apply efficient classroom management techniques that can lessen disruptions and foster a more positive learning and social development environment.

1.5 OBJECTIVE OF THE STUDY:

- To explore the role of classroom management strategies in improving students' engagement and behavior.
- To understand how specific classroom management techniques can actively reduce disruptions and encourage a positive learning environment.
- To analyze the effectiveness of various classroom management strategies as tools to foster a conducive and orderly classroom atmosphere.

1.6 RESEARCH QUESTIONS:

- Can students' self-control and concentration be enhanced by using efficient classroom management techniques?

- In what ways do good classroom management techniques promote student engagement and active participation?
- How can effective classroom management techniques create a welcoming and supportive learning environment?
- How can educators use classroom management strategies to successfully deal with disruptive behavior?

1.7 SIGNIFICANCE OF THE STUDY:

Since it creates an atmosphere free from frequent interruptions, classroom management is crucial to improving educational results. This study intends to expand our knowledge of classroom management techniques and approaches by demonstrating how they can successfully manage classroom dynamics to foster a more upbeat and effective environment. Students learn more intently, and teachers can preserve a polite, encouraging classroom atmosphere by reducing disruptions. In the end, the knowledge gathered from this study can help create a classroom environment that is advantageous to all parties by enhancing academic achievement, encouraging positive behavior, and supporting teachers' well-being.

1.8 DELIMINATION:

This study is limited to only Class 6 students, so results may vary with students from other grades. Additionally, the research was conducted in a government school setting. The study specifically focused on identifying and implementing effective classroom management strategies to reduce disruptions and create a more positive

learning environment. Lastly, the study used an action research approach, which may limit the generalizability of its findings to broader contexts.

CHAPTER 2

LITERATURE REVIEW

2.1 CLASSROOM MANAGEMENT:

According to Evertson and Weinstein (2006), classroom management is broadly defined as any activity a teacher does to establish an atmosphere that encourages and supports academic and social-emotional development. There are various reasons why the elements of good classroom management are crucial. Classroom management is a broad concept that is sometimes used synonymously with discipline but is also considered separate from classroom instruction (Egeberg et al. 2016). For instance, emphasizing preventive measures as opposed to reactive ones creates a pleasant learning environment where the instructor may concentrate on pupils who conduct well (Lewis & Sugai, 1999). Because they create a behavioral context for the classroom that outlines expectations, reinforcement, and retraining in the event of inappropriate behavior, rules and routines are effective preventative elements of classroom organization and management plans (Colvin et al., 1993).

While behavior is undoubtedly a part of classroom management, it can also be defined more broadly as encompassing the planning, organizing, and control of students, the learning process, and the classroom environment in order to establish and preserve an effective learning environment (Doyle 1986, p. 396). In schools, one of the issues that arises in the classroom with regard to the teaching process is that

students perform harassing behaviors that can disrupt both teachers and other students. As a result, the process of teaching and learning is ineffective

2.2 DISRUPTIVE BEHAVIOR:

Disruptive behaviors by students in the classroom ranged from minor annoyances to serious behavioral issues. The majority of the frequent disruptive behaviors in classrooms are minor and insignificant. . Some disruptive student behaviors include back row diversion, where students sit in the back and divert attention from other students. Students who have not participated in the designated class activities are considered non-attendance. Overly productive pupils: intelligent pupils, but it dominates every activity in the classroom (Richards & Renandya, 2002).

According to Bowen, Jensen, and Clark (2004) and Wakschlag, Leventhal, Briggs-Gowen, Danis, Keenan, and Hill (2005), some examples of these problematic behaviors include being late for class, becoming disengaged during the teaching and learning process, talking out of turn, making distracting noises, arguing with other students, becoming easily agitated by others, losing their temper, moving around the classroom needlessly, and disobeying the teacher's instructions.

Disruptive behavior can have a negative impact on the classroom climate overall by lowering academic achievement, decreasing student involvement, and increasing teacher stress, according to Emmer and Sabornie (2015). According to Sullivan, Johnson, Owens, and Conway (2014), examples of serious misconduct include verbally abusing instructors and other students, stealing, fighting, and bullying.

Additionally, Charles (1999) explains five categories of student conduct, which are as follows: 1) aggression: attacking instructors or other students verbally and physically; 2) immorality: student behavior including lying, stealing, and cheating; 3) defying authority by refusing to comply with the teacher's request; 4) Disruptions in the classroom: students shouted, wandered around, chatted loudly, and the clown hurled something; 5) Goofing off: being misled into sitting and not doing their allotted job.

2.3 EFFECTIVE STRATEGIES TO REDUCE THE DISRUPTIVE BEHAVIOR:

This classroom fosters community development, shared leadership, and a balance between the demands of students and instructors (Garret, 2008). When teachers and students adopt this method, rules also come from them. It takes abilities to establish the necessary lively and positive learning atmosphere in order to manage disruptive behaviors. The goal of classroom management is to keep the atmosphere conducive to learning so that every student may learn without interruption (Hill, 2002). Using classroom management techniques that promote, and support student learning outcomes is necessary for this. Charles (2008) asserts that teachers possess authority because they are aware of their students' aptitudes, the reasons for their boundary-setting, and the lessons they have learnt. The presentation style, word choice, and intonation are typically communicated to the teacher. Along with what they have done when students have behaved disruptively

in class, teachers also needed to express their gratitude and approbation when students peacefully follow the rules.

Essentially, well-managed classrooms are orderly, have a low prevalence of student misconduct, and have fair amounts of time spent on tasks.

According to J. S. Kounin, good classroom supervisors are better at averting disturbances in the first place (1970). Kounin found particular strategies to maintain students' attention on the task at hand and lessen the possibility of disruptions in the classroom.

- Maintain and express high standards for behavior.
- Clearly define policies and procedures and teach pupils how to adhere to them; provide a lot of teaching, practice, and reminders, especially to elementary school students and those from low socioeconomic backgrounds.
- Clearly explain to students the repercussions of misconduct.
From the first day of classes, enforce the rules in the classroom swiftly, consistently, and fairly.
- Try to help students develop self-discipline; spend time teaching them self-monitoring techniques.
- Keep up a fast-paced teaching style and ensure seamless transitions between tasks.
- Keep an eye on class activities and provide students with constructive criticism and encouragement for their actions.

- Give kids the chance to succeed in their education and social conduct, especially those who struggle with behavior.

CHAPTER 3

RESEARCH METHODOLOGY

3.1 RESEARCH DESIGN:

A mixed-methods strategy was used in this action research project, integrating quantitative and qualitative data collecting and analytic strategies. Action research is an adaptable and collaborative method designed to solve particular problems in educational settings. Teachers can identify issues, carry out treatments, and jointly evaluate their efficacy through this cyclical process of planning, acting, observing, and reflecting (Laudonia et al., 2017).

Action research encourages a culture of continuous learning and professional growth since educators actively engage in the study to enhance their methods. Action research has developed via a number of traditions and is now a generally accepted methodology in educational research, claim Kemmis & McTaggart (2005). Action research enables educators to critically analyze and reflect on their methods by fusing methodical inquiry with real-world application. This results in data-driven decisions that increase the effectiveness of instruction and improve student learning outcomes.

3.2 RESEARCH SITE:

The site for this action research project was my practicum school named **Govt Comprehensive Girls School, Block M, North Nazimabad, Karachi. 6 female**

teachers teaching to the randomly selected **30** students of Grade **6** participated in the present study.

3.3 RESEARCH INSTRUMENT:

I used the following research instruments for this action research project:

- Survey Questionnaire
- Focused Group Discussion (FGD)
- Observation Checklist

3.4 PROCEDURE OF DATA COLLECTION (ACTION PLAN):

The present research project followed action research method, and the data collection was cyclic. The data obtained from this study was helpful in understanding effective strategies of classroom management to reduce disruptions in classroom.

3.5 RECONNAISSANCE: THE PRELIMINARY STAGE:

When conducting action research, reconnaissance is the first step in identifying our current situation, our goals, and our anticipated path to success (McNiff et al., 2003). Prior to the implementation of problem-based learning, this study was preliminary. The researcher used a questionnaire to gather pre-test data for this pilot study. The objective was to observe the students' disruptive behavior in its early stages. Thus, the outcome served as the primary factor in action planning.

3.6 CYCLE 01:

3.6.1 POSITIVE REINFORCEMENT:

The teacher-researcher implemented positive reinforcement strategies as part of effective classroom management to reduce disruptions. These strategies included sharing engaging stories that highlighted appropriate classroom behavior and encouraging student interaction through discussions. Positive reinforcement, such as verbal praise or small rewards, was consistently provided to acknowledge and encourage students' adherence to classroom rules and expectations, thereby minimizing disruptive behavior.

3.6.2 QUESTIONNAIRE TOOL IMPLEMENTATION:

To evaluate the effectiveness of these strategies, a questionnaire was administered to assess changes in students' behavior and attitudes. Responses were collected from six teachers who taught a group of 30 Grade 6 students. The analysis focused on identifying patterns, variations, and improvements in student behavior related to classroom disruptions following the implementation of these management strategies.

3.7 CYCLE 02:

3.7.1 IMPLEMENTATION OF COLLABORATIVE STRATEGIES:

In Cycle Two, I explored different strategies to enhance classroom management and reduce disruptions. These included activities like collaborative learning and the

Think-Pair-Share technique. Collaborative learning encouraged students to work in small groups, fostering teamwork and minimizing off-task behavior. Think-Pair-Share activities allowed students to reflect individually, discuss their ideas with a partner, and then share with the class, ensuring active participation and reducing disruptive behaviors. These strategies provided structured opportunities for students to engage meaningfully and adhere to classroom norms.

3.7.2 QUESTIONNAIRE TOOLS AND OBSERVATION CHECKLIST

IMPLEMENTATION:

An observation checklist was introduced alongside the questionnaire to assess the effectiveness of these collaborative strategies. The observation checklist, completed by a critical friend, objectively recorded changes in student behavior during group and pair activities. Data from both the questionnaire and the observation checklist were combined to triangulate findings and validate the effectiveness of collaborative approaches in reducing classroom disruptions.

3.8 CYCLE 03:

3.8.1 IMPLEMENTATION OF CLASSROOM MANAGEMENT STRATEGIES:

Building on the findings from Cycle Two, I introduced new strategies such as Role-Playing Activities and Brain Breaks to further reduce classroom disruptions. Role-playing activities allowed students to act out scenarios related to classroom expectations, helping them internalize appropriate behaviors in an engaging and interactive way. Brain Breaks, short and structured physical or mental exercises,

were used to re-energize students and refocus their attention, minimizing off-task behavior and maintaining a calm classroom environment.

3.8.2 FOCUSED GROUP DISCUSSIONS (FGD):

To gain qualitative insights, I conducted focused group discussions (FGDs) alongside the questionnaire. Open-ended questions were used to encourage six teachers teaching the targeted students to share their experiences and perceptions of the changes in student behavior. The FGDs explored deeper perspectives, pinpointing developments in managing disruptions and evaluating the effectiveness of Role-Playing Activities and Brain Breaks as classroom management strategies.

3.9 PROCEDURE OF DATA ANALYSIS:

3.9.1 ANALYSIS QUESTIONNAIRE AND OBSERVATION CHECKLIST:

In the first and following cycles, the data collected from the questionnaire tool was subjected to a quantitative analysis. A checklist for observations was added to the questionnaire in the second repetition. The dominant pattern of the statistics was determined by taking the meaning of the responses. The mean provided a numerical description of the overall impact of positive reinforcement on pupils' behavior. By figuring out the average response for each questionnaire item, the teacher researcher was able to determine the extent to which positive reinforcement practices influenced behavioral results.

3.9.2 ANALYSIS OF FGD DATA:

The third cycle involved applying thematic analysis to the qualitative data gathered from the focused group discussion (FGD). The FGD, which involved teachers instructing the targeted students, yielded open-ended replies and insights that were methodically coded based on important themes and trends. This qualitative study examined how kids' behavior had improved while illuminating the breadth and depth of teachers' experiences.

A thorough grasp of how employing positive reinforcement affects pupils' behavior was made possible by the mixed methods approach, which combined qualitative insights with statistical patterns. A robust and comprehensive explanation of the phenomena was offered by the combination of quantitative methods and qualitative study topics over the course of the three cycles.

CHAPTER 4

DATA ANALYSIS

This chapter presents the findings of the study, encompassing a detailed analysis of the results through mean comparisons, thematic analysis, and reflections derived from the observation checklist across three cycles of action research. Data for the study, both quantitative and qualitative, were collected from six teachers teaching 30 students of Grade 6 at Government Comprehensive Girls School in Karachi.

4.1 DEMOGRAPHIC INFORMATION:

4.1.1 TABLE: DEMOGRAPHIES

NO. OF PARTICIPANTS	TEACHING IN GRADE/CLASS	GENDER	AGE MEAN
6	6	Female	28.9

4.2 DATA ANALYSIS (CYCLIC):

4.2.1 TABLE: MEAN SCORE (CYCLIC WISE)

S.NO.	TEACHER'S NAME	PRE-TEST	CYCLE 01	CYCLE 02	CYCLE 03
1.	Miss Safina	1.4	2.1	2.9	3
2.	Miss Rubab	2.3	2.8	3	3.4
3.	Miss Khadija	1.7	1.9	2	2.9

4.	Miss Fatima	1.2	2.3	2.6	3
5.	Miss Tehreem	1.3	1.8	2.9	3.6
6.	Miss Aqsa	1.6	2	3	4
TOTAL		1.58	2.15	2.73	3.31

To assess the impact of effective classroom management strategies on reducing disruptions, I used a questionnaire designed to measure changes in students' behavior. The responses were recorded on a five-point Likert scale, where 1 indicated "strongly disagree" and 5 indicated "strongly agree." As shown in Table 4.2, the mean scores ranged from 1.58 to 3.31, reflecting varying degrees of behavioral improvement.

4.2.2 FIGURE: INDIVIDUAL MEAN SCORE

4.2.3 FIGURE: GROUP MEAN SCORE

4.3 THE PRELIMINARY STAGE (PRE-TEST):

Before initiating Cycle One, I administered a pre-test questionnaire to evaluate the level of disruptive behavior among the targeted students. The average score from this pre-questionnaire was 1.58. This initial assessment provided a baseline measure of the students' behavior, which served as a foundation for implementing effective classroom management strategies to reduce disruptions.

4.4 CYCLE 01

I completed my initial cycle in three days, working with 30 Grade 6 girls. The objective was to implement effective classroom management strategies to reduce disruptions. During my initial observations and interactions, I noticed that most students exhibited disruptive behaviors, frequently interrupting lessons, talking among themselves, eating during class, or even engaging in bullying behaviors.

Many showed little interest in the lesson, and a significant gap was evident in their ability to express themselves or share personal insights effectively.

By the end of the first cycle, a remarkable transformation was observed. Students who had initially been disruptive became more polite, cooperative, and engaged. The tendency to disengage from lessons, as well as behaviors like talking unnecessarily or causing distractions, noticeably decreased. This positive change was largely attributed to the consistent use of positive reinforcement, particularly through praising appropriate behaviors. Praising desirable actions encouraged the girls to participate more actively, fostering a more focused, respectful, and collaborative classroom environment.

After using the strategies like collaborative learning, jigsaw, think per share, praising the desirable behavior, I conducted their behavioral assessment through their 6 teachers using a questionnaire tool that included items such as:

- Students in my class frequently interrupt the teacher or other students during lessons.
- Horseplay and physical disruptions are common occurrences in my classroom.
- Students in my class often refuse to follow classroom rules or procedures.
- Sarcasm and disrespect are frequent issues in my classroom.
- Students in my class frequently get out of their seats without permission.

- Disruptions in my classroom often occur when students are working in groups.
- Students in my class often argue with each other during lessons.
- My classroom environment is often disrupted by students using their phones or other electronic devices.
- Students in my class frequently make unnecessary noise during lessons.
- Disruptions in my classroom often occur during transitions between activities.
- Students in my class often disregard classroom rules and procedures.
- Sarcasm and disrespect from students towards the teacher are common in my classroom.
- Students in my class frequently engage in off-task behavior during lessons.
- Disruptions in my classroom often occur when students are not engaged in the lesson.
- My classroom environment is often disrupted by students' lack of self-control and self-regulation.

Participants rated their responses on a scale, with “Strongly Disagree” assigned a value of 1, “Disagree” a 2, “Neutral” a 3, “Agree” a 4, and “Strongly Agree” a 5. I analyzed the results by converting these ratings into numerical values and calculating the mean to evaluate the impact after one cycle. For the first cycle, the average result was determined to be 2.15.

4.5 CYCLE 02

In the second action research cycle, I employed two tools to evaluate the effectiveness of strategies for reducing classroom disruptions. First, I reused the same questionnaire from the previous cycle to assess any changes in teachers' perceptions of students' behavior following the initial interventions. Second, I conducted a Focused Group Discussion with open-ended questions to gain deeper insights into the impact of the strategies and gather feedback from participants.

4.5.1 RESULTS OF THE QUESTIONNAIRE:

After analyzing the data and calculating the average, the results from the second cycle revealed an improved score of 2.73. This outcome indicates progress in fostering positive student behavior while reducing disruptive behaviors in the classroom.

4.5.2 RESULTS OF THE FGD (FOCUSED GROUP DISCUSSIONS):

As part of the second cycle, I utilized a Focused Group Discussion (FGD) to conduct interviews with teachers. This approach aimed to collect their insights and opinions on the effectiveness of using positive reinforcement as a strategy to manage classroom disruptions. The goal was to understand teachers' perspectives on the overall benefits of this method for addressing and reducing students' disruptive behaviors.

4.5.3 THEMES:

Four major themes emerged as a thematic analysis of focused group discussion data:

1. Positive Learning Environment
2. Improved Behavior and Relationships.
3. Engagement and Participation.
4. Sustainable Classroom Practices.

- ***THEME 01: POSITIVE LEARNING ENVIRONMENT***

A positive learning environment was the first key theme that emerged from the data.

Classroom environments significantly impact students' learning experiences and their behavior. By fostering a positive atmosphere, we can do more than just deliver academic content—we can motivate, inspire, and empower students to reach their full potential. Positive reinforcement, in particular, plays a vital role in reducing disruptions by rewarding good behavior. When students are rewarded for positive actions, they are more likely to seek such rewards, leading to less disruptive behavior and creating a more focused classroom. This allows teachers to concentrate on teaching rather than managing disruptions.

Through discussions with the teachers, it became clear that positive reinforcement had a notable effect on improving students' behavior. For example, Miss Rubab shared, "I encourage students by praising those who perform well in their studies. However, I pay extra attention to those who show less interest and try to motivate them by praising their efforts to build confidence." Similarly, Miss Safeena remarked,

"I use different rewards, like giving students praise in front of the class or offering small gifts. When students do well, I make them class monitors, which boosts their self-esteem." Miss Aqsa explained, "We offer certificates and various rewards to students to encourage them, keeping the classroom atmosphere positive and helping to build their confidence."

Miss Tehreem and Miss Fatima both emphasized that positive reinforcement helps improve students' performance by fostering a supportive and encouraging environment. Miss Khadija added, "It's essential to praise students regularly, as it motivates them to engage more with their studies and reduces disruptive behavior."

- ***THEME 02: IMPROVED BEHAVIOR AND RELATIONSHIP***

The second key theme that emerged was the improvement of student performance and the development of positive teacher-student relationships. These factors are critical for creating a supportive classroom environment and promoting successful learning. Enhancing students' performance not only leads to a better understanding of academic content, higher grades, and improved test scores, but it also helps reduce classroom disruptions by fostering a sense of achievement and motivation.

Furthermore, building strong, positive relationships between teachers and students is essential for creating a collaborative and respectful classroom atmosphere.

Positive interactions encourage students to be more engaged in their studies, reducing behavioral issues. Teachers who work together to share resources,

strategies, and support improve their own teaching practices, which ultimately leads to better student outcomes and a more harmonious classroom.

Miss Rubab shared, "By rewarding students for positive performance, I've noticed significant changes in their behavior. They have become more engaged, and their work quality has improved. Their disruptive behavior has also decreased." Miss Safeena added, "Rewarding students not only boosts their motivation but also strengthens the relationship between teachers and students. Students work harder to receive appreciation and meet deadlines." Miss Aqsa emphasized, "Every student has a natural desire to be praised, and when teachers acknowledge their efforts, it creates a more positive atmosphere in the classroom." Miss Khadija observed, "Through positive reinforcement, students feel valued, which leads to better performance and fewer disruptions in class."

Miss Tehreem and Miss Fatima also agreed that fostering a positive relationship with students through rewards and encouragement helps create a cooperative and focused classroom environment, improving both behavior and academic success.

- ***THEME 03: ENGAGEMENT AND PARTICIPATION***

The third major theme that emerged from the data was the importance of engagement and participation in reducing classroom disruptions. Actively involving students in the learning process is essential for creating a focused and dynamic classroom environment. Engagement and participation can be encouraged through interactive activities, student-centered teaching methods, and positive

reinforcement for active involvement. When students are engaged and participating actively, they are more likely to remain focused and motivated, which reduces the likelihood of disruptive behavior.

Promoting engagement not only improves academic performance but also fosters a sense of ownership over their learning, making students less inclined to disrupt the class. By creating a supportive and engaging environment, teachers can encourage positive behavior, improve student well-being, and make the learning experience more enjoyable for both students and teachers.

Miss Rubab shared, "I provide positive support through interactive questions related to the topic, and I organize activities that encourage creativity and student participation." Miss Safeena emphasized, "In my lessons, I use hands-on activities that capture students' interest. When they actively participate, they not only enjoy the lesson but also enhance their critical thinking and understanding." Miss Aqsa stated, "By involving students in discussions and rewarding them for solving problems, I keep them motivated to stay on task and reduce disruptive behavior." Miss Khadija explained, "Engaging students with real-life applications of the subject matter helps them stay focused and reduces disruptions as they become more interested in the content."

Miss Tehreem and Miss Fatima both agreed that when students are encouraged to participate in class through interactive methods, they are less likely to engage in disruptive behavior and more likely to perform well academically.

- ***THEME 04: SUSTAINABLE CLASSROOM PRACTICES***

The fourth major theme that emerged from the data was the importance of creating and maintaining an orderly, respectful, and engaging classroom environment.

Effective behavior management is essential for reducing disruptions and fostering a positive learning atmosphere. It involves setting clear expectations, using positive reinforcement to encourage desired behaviors, and developing a structured yet flexible classroom routine. A well-organized classroom minimizes disruptions, promotes student focus, and supports a conducive learning environment.

By fostering a positive and well-managed classroom, teachers can create an inclusive space that encourages academic success, emotional well-being, and social growth for all students. This approach helps maintain student engagement and reduces behavioral issues, ultimately creating a more enjoyable teaching and learning experience.

Miss Rubab stated, "I use various activities to keep students engaged and focused, which helps maintain a positive classroom atmosphere. Students are more likely to participate when the environment is respectful and enjoyable." Miss Khadija emphasized, "I establish clear expectations for behavior and consistently reward positive actions. This helps reduce disruptions and allows students to stay focused on learning." Miss Safeena added, "In my classroom, I use a mix of structured routines and flexibility, which keeps the students engaged and minimizes

reinforcement creates a calm and organized classroom, where students feel motivated to succeed."

Miss Fatima and Miss Tehreem both agreed that setting a positive, supportive environment and reinforcing good behavior not only improves student performance but also significantly reduces disruptions, ensuring a better learning experience for everyone.

4.5.4 FIGURE: THEMATIC MAP

4.6 CYCLE 03

In the third cycle, I utilized two tools. First, I employed the questionnaire tool, as done in the previous cycles, to assess the changes observed in students after the second cycle. Based on the review of the results from the earlier cycles, I incorporated additional videos to promote positive student behavior. Additionally, I used an observation checklist to monitor disruptive behaviors, which was completed with the assistance of my critical friend.

4.6.1 RESULTS OF THE QUESTIONNAIRE:

After completing the third round of calculations and determining the mean, the results from the questionnaire for the final cycle indicate a score of 3.31. This score demonstrates the effectiveness of implementing strategies in the classroom to reduce disruptions. It highlights a significant improvement in students' ability to avoid disruptive behavior, reflecting the success of the approaches used in this cycle.

4.6.2 RESULTS OF THE OBSERVATION CHECKLIST:

In the third cycle, I used the observation checklist as the second tool. My critical friend analyzed student engagement using this checklist, which focused on strategies to reduce disruptions in the classroom. The checklist included items such as:

- Students actively listen and follow instructions promptly.

- They raise their hands before speaking or contributing to class discussions.
- They remain focused on the assigned tasks without getting distracted.
- They communicate respectfully with peers and teachers.
- They collaborate effectively during group activities without causing disturbances.
- They comply with classroom rules and routines without resistance.
- They respond calmly and appropriately to feedback or corrections.

Participants rated these behaviors using a scaling system: 1 for Never, 2 for Occasionally, 3 for Frequently, and 4 for Almost Constantly, with an option to provide additional comments. I then evaluated the results based on these numerical values to assess the effectiveness of the strategies implemented. The mean result of the observation checklist in this cycle was 3.1, indicating a positive impact on reducing classroom disruptions.

CHAPTER 5

CONCLUSION, DISCUSSION AND RECOMMENDATIONS

This chapter explores the study's findings in connection with prior research, emphasizing its significance in contributing to the existing body of knowledge and academic practices. Additionally, it includes the conclusion, examines the study's implications, and concludes by addressing its limitations.

5.1 DISCUSSION:

This research examined the effectiveness of implementing specific strategies to minimize classroom disruptions and foster a supportive learning environment. The study was conducted in a 6th Grade classroom, focusing on the application of effective approaches to manage and reduce disruptive behaviors while promoting active student engagement.

The main objective was to assess whether these strategies could successfully decrease disruptions and enhance the overall classroom atmosphere. A mixed-methods approach was used, combining both qualitative and quantitative methods over three cycles. In each cycle, I implemented strategies such as cooperative learning, think-pair-share activities, and other structured methods designed to encourage collaboration, participation, and focus among students. Data was

collected using tools such as questionnaires, observation checklists, and focus group discussions (FGDs).

The questionnaire results were analyzed by calculating mean scores across all three cycles, comparing data from before and after the interventions. Each cycle showed progressive improvement. The first cycle demonstrated modest positive changes, the second cycle showed further advancements, and the third cycle exhibited a significant increase in the mean score, indicating the success of these strategies in reducing disruptions and enhancing student behavior.

Feedback from teachers during FGDs provided additional support for the study's findings. Teachers noted considerable improvements in student behavior, including greater engagement during lessons, active participation in cooperative activities, and a noticeable decline in disruptive actions. These results highlight the effectiveness of the implemented strategies in creating a positive and orderly classroom environment.

According to research findings, effective behavior management strategies included establishing explicit rules, giving general praise, and giving behavior-specific praise. (Gable, Hester, Rock, & Hughes, 2009; Henly, 2010; Kerr & Nelson, 2010; Wheeler & Richey, 2010; Pisacreta, Tincani, Connell, & Axelrod, 2011; Wan Mazwati Wan Yusoff, 2012) These easy methods can increase student participation in the classroom and help reduce disruptive behaviors. Since Wan Mazwati Wan Yusoff's techniques were taken from the Prophet Muhammad Tradition (hadith), one of the

main sources of knowledge in Islam, they are better suited for Muslim students.

These techniques include evidence-based behavior specific praise and stating clear rules.

Teachers can lessen disruptive behaviors in the classroom by altering the physical and emotional environment in addition to implementing behavior management strategies and intervention programs. A positive emotional environment in the classroom fosters constructive relationships, collaboration, and trust between students and teachers, which may reduce misbehavior in the classroom (Brackett, Reyes, Rivers, Elbertson, & Salovey, 2011).

Possessing a positive attitude and excellent social intelligence is another effective way to deal with misbehavior in the classroom. Through debate, acknowledgment, participation, and hinting, a teacher with high social intelligence would foster a good and encouraging learning atmosphere in the classroom that would increase students' intrinsic motivation (Yahyazadeh Jeloudar & Aida Suraya Md Yunus, 2011).

Teachers can select strategies that meet their needs and meet the following requirements: the strategies must be easy to implement, meaning they don't require outside assistance, take little time to prepare, and be readily available; they must not take up a lot of class time or interfere with regular classroom activities; and they must be effective, meaning they lessen and prevent the occurrence of disruptive behaviors (Guardino & Fullerton, 2010; Cholewa, Smith-Adcock, & Amatea, 2010).

5.2 CONCLUSION:

This study explored the effectiveness of various strategies in managing disruptive behavior in 6th Grade students at a government school, focusing on approaches such as cooperative learning, think-pair-share activities, peer mentoring, group work, setting clear expectations, providing consistent feedback, and offering individualized support. These strategies aimed to encourage positive behavior, foster active student engagement, and promote collaboration, rather than relying on punitive measures. The findings showed a significant reduction in disruptive behaviors and an improvement in the classroom environment, with students becoming more engaged, collaborating effectively, and adhering to classroom routines. The strategies contributed to a more inclusive learning atmosphere, supporting both academic achievement and social development. Overall, the research highlights the value of proactive, student-centered strategies in transforming classroom dynamics and creating a positive, supportive environment for learning in government schools.

5.3 RECOMMENDATION:

Based on the findings of this study, several recommendations can be made to enhance the effectiveness of strategies in managing disruptive behavior in 6th Grade classrooms at government schools:

- Teachers should be provided with ongoing professional development opportunities focused on implementing a variety of classroom management

strategies, such as cooperative learning, think-pair-share activities, and peer mentoring. Training should include practical examples and role-playing scenarios, allowing educators to adapt these strategies to meet the diverse needs of students. This will ensure that teachers can consistently apply these strategies effectively, leading to improved classroom management and student engagement.

- Classroom management techniques should be integrated with other strategies, such as setting clear expectations, providing structured routines, and offering personalized feedback, to address the different needs of students. By combining these approaches, teachers can create a more comprehensive system for managing behavior, which will better support students who may need additional interventions to thrive academically and socially.
- Schools should encourage teachers to create individualized learning plans that cater to the unique preferences and learning styles of each student. By understanding the motivations and interests of students, teachers can tailor strategies like cooperative activities or peer-led projects to better engage them. Incorporating student input into the process can foster a sense of ownership and motivation, making the classroom environment more conducive to positive behavior and academic success.

5.4 LIMITATION:

This action research has several limitations. The sample size was small, with only 6 teachers and 30 Grade 6 students from a government comprehensive girls' school, limiting the generalizability of the results. Additionally, the study focused only on Grade 6 students, so the findings may not apply to other age groups or grade levels. Conducted in a specific government school, the results may not be applicable to other educational settings. Finally, the study lacked a control group and did not have enough time to assess the long-term impact of positive reinforcement on disruptive behavior.

5.5 FUTURE RESEARCH:

Future research could broaden the scope of this study by including a larger, more diverse sample of students from different grade levels and educational settings. A longitudinal design could also be used to explore the long-term effects of strategies such as cooperative learning and think-pair-share on student behavior and academic outcomes. Additionally, future studies could focus on: (i) Future research could broaden the scope of this study by including a larger, more diverse sample of students from different grade levels and educational settings. A longitudinal design could also examining the effectiveness of these strategies in reducing disruptive behavior among secondary school students with varying learning needs; (ii) investigating the impact of these approaches on student motivation, engagement, and academic performance in secondary school environments; (iii) exploring the role of teacher-student relationships in the success of strategies to manage

disruptive behavior; and (iv) assessing the impact of these strategies on reducing disciplinary actions, such as suspensions and expulsions, in secondary schools.

APPENDIX-I (CYCLE 01)

LESSON PLAN NO: 01 (Topic: Types of Maps & it uses)

Objectives

By the end of the lesson, students will be able to:

1. Identify and differentiate between physical, political, thematic, and climatic maps.
2. Explain the purpose and importance of each type of map.
3. Work collaboratively to analyze and share information.

Resources

1. Samples of different types of maps (printed or digital).
2. Chart paper and markers for group work.
3. A projector or board for visual aids.
4. Handouts summarizing key points about map types.

Classroom Management Strategy

1. Arrange the classroom in clusters for group work.
2. Clearly assign roles within groups (reader, note-taker, presenter, etc.).
3. Monitor groups to ensure equal participation and on-task behavior.

Procedure:

1. Initiation/ Motivation

1. Begin by asking students if they have ever used a map (e.g., in a video game, on a trip).
2. Show a world map and ask students what information they can get from it.
3. Pose a question: “Why do we have different kinds of maps?”

2. Announcement of the topic:

Today we are going to discuss about the kind of maps

3. Development

1. Briefly explain the four types of maps:

- Physical Maps: Show natural features like mountains, rivers, and plains.
- Political Maps: Indicate countries, states, and cities.
- Thematic Maps: Highlight specific data, such as population or rainfall.
- Climatic Maps: Display weather patterns and climate zones.

2. Use visual aids to show examples of each type.

4. Activity

- Jigsaw Activity

1. Divide the class into four groups, assigning each group one type of map.
2. Provide resources (handouts, samples) for each group to study their assigned map type.
3. Ask groups to create a short presentation or poster summarizing:
 - What their map shows.
 - How it is useful.
4. Reorganize students into mixed groups, ensuring one member from each original group is present.
5. Each student shares their expertise with the mixed group.

5. Recapitulation

1. Conduct a quick quiz:
 - Show images of different maps and ask students to identify their types.
 - Discuss real-life scenarios where each map type would be useful.

6. Evaluation

1. Observe group participation during the activity to assess collaboration skills.
2. Check presentations to understand map types.
3. Ask reflective questions:
 - Which map type did you find most interesting?
 - How do you think maps are created?

7. Homework

Ask students to bring an example of any map they can find at home (printed or online) and explain its use in the next class.

LESSON PLAN NO: 02 (Topic: Life of Indus Valley Civilization)

Objectives

By the end of the lesson, students will be able to:

1. Describe the key aspects of life in the Indus Valley Civilization.
2. Identify the contributions of the civilization in fields like trade, architecture, and art.
3. Collaborate with peers to share knowledge and create presentations.

Resources

1. Pictures of Indus Valley artifacts, cities, and seals.
2. Chart paper, markers, and craft materials for presentations.
3. A short video about the Indus Valley Civilization.

Classroom Management Strategy

1. Form groups of 4-5 students, ensuring diversity in abilities.
2. Assign roles (researcher, designer, presenter, etc.) within each group.
3. Encourage respectful listening and equal participation.

Procedure:

1. Initiation/ Motivation

1. Begin by showing pictures of Mohenjo-Daro and Harappa.
2. Ask students:
 - “What do you think life was like in this civilization?”
 - “What surprises you about these pictures?”

2. Announcement of the topic:

Today we are going to discuss about civilization of Indus Valley

3. Development

1. Provide a brief overview of the Indus Valley:
 - Well-planned cities with drainage systems.
 - Trade and commerce using seals.
 - Artistic achievements, such as pottery and sculptures.
2. Show a short video clip highlighting these features.

4. Activity

- Group Work

1. Divide students into groups and assign each group one topic:
 - Architecture
 - Trade and commerce
 - Art and crafts
 - Daily life and governance
2. Groups research their topic using provided materials and prepare a poster or mini-presentation.
3. Each group presents their findings to the class.

5. Recapitulation

1. Summarize the key points from each group's presentation.
2. Discuss:
 - What made the Indus Valley a successful civilization?
 - How does it compare to modern cities?

6. Evaluation

1. Assess the quality of group presentations.
2. Ask reflective questions:
 - What did you find most interesting about this civilization?
 - How do you think it influenced later civilizations?

7. Homework

Enlist some names of Indus Valley Civilizations

APPENDIX-II (QUESTIONNAIRE)

EFFECTIVE STRATEGIES QUESTIONNAIRE

SD= Strongly Disagree	D= Disagree	N= Neutral	A= Agree	SA= Strongly Agreed
------------------------------------	-----------------------	----------------------	--------------------	----------------------------------

Student Name _____ **Class** _____ **Date** _____

ITEM NO.	ITEMS	SD 1	D 2	N 3	A 4	SA 5
1.	Students in my class frequently interrupt the teacher or other students during lessons.					
2.	Horseplay and physical disruptions are common occurrences in my classroom					
3.	Students in my class often refuse to follow classroom rules or procedures.					
4.	Sarcasm and disrespect are frequent issues in my classroom.					
5.	Students in my class frequently get out of their seats without permission.					
6.	Disruptions in my classroom often occur when students are working in groups.					

7.	Students in my class often argue with each other during lessons.					
8.	My classroom environment is often disrupted by students using their phones or other electronic devices.					
9.	Students in my class frequently make unnecessary noise during lessons.					
10.	Disruptions in my classroom often occur during transitions between activities.					
11.	Students in my class often disregard classroom rules and procedures.					
12.	Sarcasm and disrespect from students towards the teacher are common in my classroom					
13.	Students in my class frequently engage in off-task behavior during lessons.					
14.	Disruptions in my classroom often occur when students are not engaged in the lesson.					

15.	My classroom environment is often disrupted by students' lack of self-control and self-regulation.					
-----	--	--	--	--	--	--

APPENDIX-III (CYCLE 02)

LESSON PLAN NO: 03 (Topic: Role of Government)

Objectives

By the end of the lesson, students will be able to:

1. Explain the purpose and functions of government.
2. Identify examples of government roles in daily life.
3. Share and discuss ideas with peers.

Resources

1. Pictures or examples of government activities (e.g., schools, roads, police).
2. Worksheet with scenarios illustrating the absence of rules.

Classroom Management Strategy

1. Arrange students in pairs for Think-Pair-Share activity.
2. Monitor discussions and provide guidance as needed.

Procedure

1. Initiation/ Motivation

1. Start with a story or scenario: “Imagine your school has no rules. What would happen?”
2. Discuss why rules and order are essential.

2. Announcement of the Topic:

Today we are going to discuss about the role of our government

3. Development

1. Explain the key functions of a government:
 - Making laws.
 - Maintaining order.
 - Providing services like education and healthcare.
2. Show real-life examples or pictures.

4. Activity

- Think-Pair-Share

1. Pose the question: “What would happen if there were no traffic laws?”
2. Students first think individually, then discuss with a partner.
3. Pairs share their ideas with the class.

5. Recapitulation

1. Summarize the functions of government using student responses.
2. Ask students to provide examples of government services they’ve seen.

6. Evaluation

1. Observe the quality of participation during Think-Pair-Share.
2. Ask reflective questions:
 - Why is government important in your life?
 - Can you name one service provided by your local government?

7. Homework

Write 5 points on the role of government

LESSON PLAN NO: 04 (Topic: Natural Resources)

Objectives

By the end of the lesson, students will be able to:

1. Differentiate between renewable and non-renewable resources.
2. Suggest ways to conserve natural resources.
3. Work collaboratively on a creative project.

Resources

1. Pictures or examples of natural resources.
2. Chart paper, markers, and craft materials.
3. A brief informational handout.

Classroom Management Strategy

1. Form groups of 3-4 students for cooperative learning.
2. Ensure groups stay on-task and collaborate effectively.

Procedure

1. Initiation/ Motivation

1. Show pictures of forests, rivers, and minerals. Ask:

- “What do these have in common?”
- “Why are they important to us?”

2. Announcement of the topic:

Today we are going to discuss about natural resources

3. Development

1. Explain the difference between renewable and non-renewable resources.

- Renewable: Sunlight, water.
- Non-renewable: Fossil fuels, minerals.

2. Discuss why conservation is essential.

4. Activity

- Cooperative Learning

1. Assign each group a resource (e.g., water, forests, minerals).

2. Groups create a poster illustrating:

- Why their resources are important.
- Ways to conserve it.

3. Groups present their posters to the class.

5. Recapitulation

1. Summarize the importance of conserving resources.

2. Highlight student suggestions for conservation.

6. Evaluation

1. Assess the creativity and accuracy of group posters.

2. Ask reflective questions:

- Which resource do you think is most at risk?
- What can you do to conserve resources in your daily life?

7. Homework

Enlist at least 5 renewable and non-renewable natural resources

APPENDIX-IV (QUESTIONS)

QUESTIONS FOR FOCUSED GROUP DISCUSSION

- 1.** In your opinion, what impact have the classroom management strategies you implemented had on student behavior? Have you noticed any noticeable changes in the students?
- 2.** After applying specific strategies, have you observed any reduction in disruptions among students? If yes, what kind of changes have you seen?
- 3.** Which strategies, in your experience, have helped students stay more focused and avoid unnecessary disruptions? Could you share any examples?
- 4.** Do you believe your strategies have improved students' academic performance or the overall classroom environment? If so, in what way?
- 5.** In your view, what factors have the greatest influence on student behavior? Do you think your strategies have positively impacted these factors?

APPENDIX-V (CYCLE 03)

LESSON PLAN NO: 05 (Topic: Diversity in Society)

Objectives

By the end of the lesson, students will be able to:

1. Recognize the cultural diversity in society.
2. Explain the importance of respecting and celebrating differences.
3. Work collaboratively to complete a creative activity.

Resources

1. Pictures of festivals, traditional attire, and cuisines from different cultures.
2. Puzzle pieces with cultural symbols or items.
3. Chart paper and markers.

Classroom Management Strategy

1. Divide students into small groups for the puzzle activity.
2. Ensure each group has equal access to resources.
3. Encourage respectful discussions and teamwork.

Procedure

1. Initiation/ Motivation

1. Show pictures of festivals like Diwali, Eid, Christmas, and Pongal. Ask:
 - “What do you notice about these pictures?”
 - “What makes them special?”
2. Highlight how different cultures enrich society.

2. Announcement of the topic:

Today we are going to discuss about the diversity of our society

3. Development

1. Explain the concept of diversity:
 - Different religions, languages, festivals, and traditions.
 - Importance of unity in diversity.

2. Use real-life examples to emphasize respect and inclusivity.

4. Activity

- Puzzle Activity

1. Each group receives a set of puzzle pieces representing cultural symbols (e.g., a saree, a Christmas tree, a mosque, etc.).
2. Groups assemble the puzzle and identify the cultural elements.
3. Once completed, they discuss the significance of the elements in their culture.

5. Recapitulation

1. Discuss how diversity contributes to society's richness.
2. Ask each group to share one thing they learned about another culture.

6. Evaluation

1. Observe group participation and creativity during the activity.
2. Ask reflective questions:
 - What do you like about living in a diverse society?
 - How can we promote respect for different cultures?

7. Homework

Write 5 points on diversity in culture

LESSON PLAN NO: 06 (Topic: Weather & Climate)

Objectives

By the end of the lesson, students will be able to:

1. Differentiate between climate and weather.
2. Understand how weather and climate affect daily life.
3. Participate in a group role-play activity.

Resources

1. Pictures and videos showing different weather conditions and climates.
2. Weather forecast examples (real or simulated).

3. Role-play cards with different scenarios.

Classroom Management Strategy

1. Form small groups for the role-play activity.
2. Provide clear instructions and monitor group dynamics.

Procedure:

1. Initiation/ Motivation

1. Show a short video of varying weather conditions (rain, snow, heat).
2. Ask students:
 - “What is the weather like today?”
 - “How does it affect your daily activities?”

2. Announcement of the topic:

Today we are going to discuss about weather and climate

3. Development

1. Explain the difference between weather and climate:
 - *Weather*: The condition of the atmosphere over a short period.
 - *Climate*: The average weather of a place over a long period.
2. Give examples (e.g., tropical climate vs. rainy day).

4. Activity

- Group Role-Play

1. Assign each group a scenario (e.g., reporting a weather forecast, effects of climate change, how to prepare for extreme weather).
2. Groups prepare a short role-play based on their scenario.
3. Each group presents their role-play to the class.

5. Recapitulation

1. Summarize the key differences between climate and weather.
2. Discuss how they influence human activities like farming, travel, and clothing.

6. Evaluation

1. Assess creativity and teamwork during the role-play.

2. Ask reflective questions:

- What surprised you about the relationship between weather and climate?
- How do you think climate affects where people live?

7. Homework

Write the definition of weather & climate

APPENDIX-VI (CHECKLIST)

OBSERVATION CHECKLIST

Observer: _____ Date: _____

Classroom Information: _____

Grade: _____ Duration: _____

S.NO.	QUESTIONS	YES	NOT SURE	NO	COMMENTS
1.	Students actively listen and follow instructions promptly.				
2.	They raise their hands before speaking or contributing to class discussions.

Karachi.

SUBJECT: PERMISSION TO CONDUCT ACTION RESEARCH AS PART OF B.ED. STUDIES

Dear Sir/Madam,

The action research is an extended activity of the teaching practice (Practicum) of the current B.Ed. curriculum. Mr./Ms. Hafiz Muhammad Mujtaba Saleem is currently enrolled in this college as a student of B.Ed. (Elementary)/ (Secondary) in the 8th/5th semester 2024. He/She is conducting a research entitled Effective strategies of classroom management to reduce disruption in classroom under the supervision of Prof. Tabassum Kausar.

Kindly allow him/her to implement innovative teaching strategies and/or to collect necessary data. During this process, he/she will strictly follow the research ethics. Your cooperation and facilitation in this academic activity will be highly appreciated.

Best Regards,

19/7/24
